by CELT

Managed Security Solutions All-in-One Firewall Security Solutions

Integrity by CELT's Firewall is Your First Line of Defense

Integrity by CELT's award-winning firewall security system integrates multiple security applications into an all-in-one solution that is easy to install and manage. We offer a complete network security solution providing more power, quality, versatility, and performance than any firewall in its class.

Our firewall manages inbound and outbound communications traffic. This software solution can be installed on standard PC hardware or is available as a hardware solution and placed at the point where the Internet enters your facility, controlling network traffic for security purposes.

A user-friendly point-and-click interface allows administrators to block or allow access for each protocol, and to each internal network, server, service, and user group. The firewall inspects both networking information (packet headers) and application information (payloads) to detect and block suspicious traffic.

**KEY BENEFITS OF INTEGRITY BY CELT'S
ALL-IN-ONE MANAGED SECURITY SOLUTION:**

- Best-of-Breed - Proven technology
- Monitored and managed by security experts
- E-Rate eligible
- Affordable and scalable

Your Best Defense

INTEGRITY's security appliances provide complete, cost-effective protection against a wide range of information security threats. It is fully integrated in one easy-to manage package.

FEATURES:

All-in-one solution provides ultimate protection through seven critical security applications:

Firewall – with stateful packet inspection & application-level proxies to guard Internet traffic in and out of your school

VPN Gateway – to assure secure communications with remote offices or home
Intrusion Protection – to detect and stop hostile probes and application-based attacks

Anti-Virus – to defend computers from both email-borne and web-borne viruses
Spam Filtering – to eliminate the productivity drain of opening and deleting unsolicited emails
Surf Protection – to improve productivity by blocking inappropriate activities beyond CIPA requirements

Spyware Filtering – to eliminate spying and manage bandwidth. No need to spend money on spyware software

Astaro's technology is constantly updated and protects against over 2,000 intrusions, 100,000 viruses, thousands of spammers and 20 million questionable websites – the broadest range of protection available in one product. The security appliance comes with monitoring and support as well as optional content filtering and email filtering.

SOFTWARE SOLUTION

Our security solution is available as software for installation on standard computers, or pre-installed on security appliances. Our affordable software solution is scalable and does not require expensive hardware.

E-RATE ELIGIBLE

Complete network security ensures safe Internet learning. Our managed firewall solution is E-Rate eligible as priority one for Internet service since it is provided as a service and is necessary to ensure continued operation of your network. With the exception of content filtering (optional), our firewall is also E-Rate eligible under internal connections if purchased outright.
